
HO-500

The HO-500 is the most powerful machine to generate mixed hydrogen and oxygen gas in our standard product. HO-500 is uniquely positioned to meet this full range of needs in excellent performance. It supplies 2000 lit/h of oxy-hydrogen gas. It is suitable for large manufactory which consumes larger volume of oxy-hydrogen gas for multi-task working, such as metal fabrication and glass fusion. In the jewelry industry, HO-500 can offer oxy-hydrogen up to 20 torches using together that will give most effective manage your manufacture. Please contact us request further information.

Feature

- Just-In- Time Hydrogen generator ----process provide 24 hours operating and no gas storage in machine
- Operating ---- provide automatic control system
- Safety --- Leak checking and over heat stop and low water level alarm
- Zero maintenance ---- minimum moving part
- Supper power ---- large gas flow rate
- Customize ---- discretionarily choose accessory, such as tips, bracket of torch
- Independence ---- eliminae the impacts of traffic, weather, and other distribution

Application

- Jewelry industry
- Wire soldering
- Glass fusion
- Acrylic polishing
- Dental application
- Metal cutting
- Glass fusion

Specificaiton

Technical data	HO-500
Gas prodcution	2000 lit/hr
Operationg pressure	0.5 - 1.0 Bar
Power consumption	3500-4000 watt
Size (w×d×h)	54×72×75120 cm
Weight(kg)	175 kg
